

## **LAWN MOWERS – BEWARE**

(Summer)

One of the unfortunate side effects of the mild, wet weather is that the grass cutting season could come early. Unfortunately, burglars are also affected by the weather and are now starting to stock up with lawnmowers and any other garden instrument they can get their hands on.

So please ensure your outbuildings and garages are very secure and it would be worthwhile chaining your garden machinery to a firm point. As an added precaution, it would be better if you security coded any valuable equipment as it is difficult for burglars to sell coded goods.

Don't let the burglars spoil your summer.
